Detection of adulteration in *Hydrastis canadensis* (goldenseal) dietary supplements via untargeted mass spectrometry-based metabolomics

Emily D. Wallace, Nicholas H. Oberlies, Nadja B. Cech, Joshua J. Kellogg

PII: S0278-6915(18)30478-2

DOI: [10.1016/j.fct.2018.07.033](https://doi.org/10.1016/j.fct.2018.07.033)

Reference: FCT 9918

To appear in: *Food and Chemical Toxicology*

Received Date: 7 May 2018

Revised Date: 19 June 2018

Accepted Date: 17 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Detection of Adulteration in *Hydrastis canadensis* (Goldenseal) Dietary Supplements via Untargeted Mass Spectrometry-based Metabolomics
