A distributed computational model for estimating room air level of constituents due to aerosol emission from e-vapor product use

Ali A. Rostami, Samuel Agyemang, Yezdi B. Pithawalla

PII: S0278-6915(18)30222-9

DOI: [10.1016/j.fct.2018.04.020](https://doi.org/10.1016/j.fct.2018.04.020)

Reference: FCT 9709

To appear in: *Food and Chemical Toxicology*

Received Date: 12 January 2018

Accepted Date: 9 April 2018

Please cite this article as: Rostami, A.A., Agyemang, S., Pithawalla, Y.B., A distributed computational model for estimating room air level of constituents due to aerosol emission from e-vapor product use, *Food and Chemical Toxicology* (2018), doi: 10.1016/j.fct.2018.04.020.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A distributed computational model for estimating room air level of constituents due to aerosol emission from e-vapor product use
