70026 Modugno (BA) - Italy

e-mail agostinodiciaula@tiscali.it

Keywords: 5G; MMW; RF-EMF; cancer; noncommunicable diseases; prevention

Highlights RF-EMF exposure is rising and health effects of are still under investigation

- Both oncologic and non-cancerous chronic effects have been suggested
- 5G networks could have health effects and will use MMW, still scarcely explored
- Adequate knowledge of RF-EMF biological effects is also needed in clinical practice
- Underrating the problem could lead to a further rise in noncommunicable diseases
