Toward a better extraction of titanium dioxide engineered nanomaterials from complex environmental matrices

Frédéric Loosli, Zebang Yi, Debora Berti, Mohammed Baalousha

PII: S2452-0748(18)30020-X
DOI: doi:[10.1016/j.impact.2018.06.002](https://doi.org/10.1016/j.impact.2018.06.002)
Reference: IMPACT 122
To appear in: *NANOIMPACT*
Received date: 17 February 2018
Revised date: 13 June 2018
Accepted date: 20 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Toward a better extraction of titanium dioxide engineered nanomaterials from complex environmental matrices
