

## Accepted Manuscript

Title: Intranasal administration of sodium dimethyldithiocarbamate induces motor deficits and dopaminergic dysfunction in mice

Authors: Josiel M. Mack, Tainara M. Moura, Débora Lanznaster, Franciane Bobinski, Caio M. Massari, Tuane B. Sampaio, Ariana E. Schmitz, Luiz F. Souza, Roger Walz, Carla I. Tasca, Anicleto Poli, Richard L. Doty, Alcir L. Dafre, Rui D. Prediger

PII: S0161-813X(18)30092-5  
DOI: <https://doi.org/10.1016/j.neuro.2018.03.011>  
Reference: NEUTOX 2317

To appear in: *NEUTOX*

Received date: 24-10-2017  
Revised date: 27-3-2018  
Accepted date: 28-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Intranasal administration of sodium dimethyldithiocarbamate induces motor deficits and dopaminergic dysfunction in mice**
