Title: Reduced maternal behavior caused by gestational stress is predictive of life span changes in risk-taking behavior and gene expression due to altering of the stress/anti-stress balance

Authors: Eleonora Gatta, Jérôme Mairesse, Lucie Deruyter, Jordan Marrocco, Gilles Van Camp, Hammou Bouwalerh, Jean Marc Lo Guidice, Sara Morley-Fletcher, Ferdinando Nicoletti, Stefania Maccari

PII: S0161-813X(18)30106-2
DOI: <https://doi.org/10.1016/j.neuro.2018.04.005>
Reference: NEUTOX 2322

To appear in: *NEUTOX*

Received date: 26-10-2017
Revised date: 3-4-2018
Accepted date: 4-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
