This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Developmental exposure to low concentrations of two brominated flame retardants, BDE-47 and BDE-99, causes life-long behavioral alterations in zebrafish

Running Head: Developmental neurobehavioral toxicity of brominated flame retardants in zebrafish

Keywords: Zebrafish; chlorpyrifos; BDE 47; BDE 99; Brominated Flame Retardants; Development; Neurobehavioral Toxicology
