Title: Perfluoroalkylated substances (PFAS) affect neither estrogen and androgen receptor activity nor steroidogenesis in human cells *in vitro*

Authors: Anne-Cathrin Behr, Dajana Lichtenstein, Albert Braeuning, Alfonso Lampen, Thorsten Buhrke

PII: S0378-4274(18)30116-4
DOI: <https://doi.org/10.1016/j.toxlet.2018.03.029>
Reference: TOXLET 10144

To appear in: *Toxicology Letters*

Received date: 4-12-2017
Revised date: 7-3-2018
Accepted date: 26-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Perfluoroalkylated substances (PFAS) affect neither estrogen and androgen
receptor activity nor steroidogenesis in human cells *in vitro***
