This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Document Title:

Effect of aqueous dilution on the absorption of the nerve agent VX through skin *in vitro*

Authors:

Christopher Dalton, Stuart Graham and John Jenner

Affiliation:

CBR Division, Dstl Porton Down, Salisbury, SP4 0JQ, UK

Key Terms:

Percutaneous penetration, percutaneous absorption, diffusion cell, aqueous dilution, chemical warfare agent.
