Delivery efficiencies of constituents of combustion-derived aerosols across the air-liquid interface during in vitro exposures

Sandro Steiner, Pierrick Diana, Eric Dossin, Philippe Guy, Grégory Vuillaume, Athanasios Kondylis, Shoaib Majeed, Stefan Frentzel, Julia Hoeng

PII: S0887-2333(18)30321-7
DOI: doi:[10.1016/j.tiv.2018.06.024](https://doi.org/10.1016/j.tiv.2018.06.024)
Reference: TIV 4319

To appear in: *Toxicology in Vitro*

Received date: 19 March 2018

Revised date: 20 June 2018

Accepted date: 29 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Delivery efficiencies of constituents of combustion-derived aerosols across the air-liquid interface during *in vitro* exposures
