In vitro assessment of chemotherapy-induced neuronal toxicity

Chelsea Snyder, Lanlan Yu, Tin Ngo, Daniel Sheinson, Yuda Zhu,
Min Tseng, Dinah Misner, Karin Staflin

PII: S0887-2333(18)30041-9
DOI: <https://doi.org/10.1016/j.tiv.2018.02.004>
Reference: TIV 4228
To appear in: *Toxicology in Vitro*
Received date: 11 September 2017
Revised date: 13 December 2017
Accepted date: 6 February 2018

Please cite this article as: Chelsea Snyder, Lanlan Yu, Tin Ngo, Daniel Sheinson, Yuda Zhu, Min Tseng, Dinah Misner, Karin Staflin , In vitro assessment of chemotherapy-induced neuronal toxicity. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Tiv*(2017), <https://doi.org/10.1016/j.tiv.2018.02.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***In vitro* assessment of chemotherapy-induced neuronal toxicity**

Chelsea Snyder¹, Lanlan Yu^{1†}, Tin Ngo^{1†}, Daniel Sheinson², Yuda Zhu², Min Tseng¹, Dinah Misner¹, Karin Staflin^{1*}

Keywords: Neurotoxicity, Neuropathy, Neurite dynamics, iPSC derived neurons, apoptosis, *in vitro* models

Abbreviations

CNS, Central nervous system; CIPN, Chemotherapy-induced peripheral neuropathy; DRG, dorsal root ganglia; LOECs, lowest observed effect concentrations; LSTs, lowest significant times, GABBR, gamma-aminobutyric acid B receptor; iPSC, induced-pluripotent stem cell; MOA, mechanism of action; PN, peripheral neuropathy.
