## ABSTRACT

**Objective:** The goal of this study was to construct an evaluation index system for the innovativeness of nursing papers.

**Methods:** A total of 17 nursing experts were consulted for two rounds, and the reliability and weight of the constructed evaluation index system for the innovativeness of nursing papers were determined.

**Results:** An evaluation system for the innovativeness of nursing papers was constructed, including 3 primary indexes, 8 secondary indexes, 14 tertiary indexes, and 8 quaternary indexes. The 3 primary indexes with their weights were new argument (0.547), new evidence (0.345), and new conclusion (0.109).

**Conclusions:** The representativeness, the enthusiasm for the study, the degree of authority, the degree of coordination, and the convergence of the experts were high; therefore, an evaluation index system for the innovativeness of nursing papers based on the Delphi method can comprehensively and scientifically evaluate the innovativeness of nursing papers.
