#### ABSTRACT

The status of ostomy-specialized nurses' training and the specialized care for patients with permanent colostomy both in China and abroad are analyzed. Based on features and characteristics of the development of ostomy care outside China, problems in China's ostomy care are discussed to promote the sustainable development of this type of care.

#### 1. Introduction

In recent years, the incidence of rectal cancer in China has been increasing rapidly.<sup>1</sup> As of 2005, the cumulative number of patients with permanent colostomies in China has reached more than 1 million,<sup>2</sup> and it is estimated that there were 312,000 new cases of
