## Source of Funding

Dr. Kheirbek received funds from the Veterans Affairs Capitol Health Care Network to establish the Center for Health and Aging at the Washington DC VA Medical Center.

More Americans are living to 90 years of age and beyond. The U.S. Census Bureau reports that the number of nonagenarians may reach 9 million by 2050. It is the fastest growing segment in older populations.

Little data is available to support hypertension guidelines in real world patients over the age of 90.<sup>1</sup> Nonagenarians have been under-represented in therapeutic trials, resulting
