This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title Page**

**Title:** Atrial Flutter Has Less Left Atrial Spontaneous Contrast and Higher Left Atrial Appendage Emptying Velocity Compared With Atrial Fibrillation

**Type of manuscript:** Clinical Research Study

**Funding Source:** None

**Running head:** Atrial fibrillation, atrial flutter, left atrial spontaneous contrast, left atrial appendage emptying velocity

**Authors and Affiliations:**
