**Running title:** Personalized Pain Goal in Cancer Pain

**Key words:** cancer pain, personalized, goal, outcome measure, clinical, response

Total Number of pages including title page, references: 15

Total number of tables: 5; Total number of figures: 2

**Condensed abstract:** Personalized pain goal is a feasible pain outcome measure in routine cancer pain management. Higher baseline pain intensity, depression, opioid dose, and number of adjuvant analgesics were predictors of poor pain relief.
