This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hydroxocobalamin with or without methylene blue may improve fluid balance in critically ill patients with vasoplegic syndrome after cardiac surgery: a report of two cases

Michael T. Zundel MD, Joel T. Feih PharmD, Joseph R. G. Rinka PharmD,
Brent T. Boettcher DO, Julie K. Freed MD PhD, Markus Kaiser MD, Huzefa Y. Ghadiali MD,
Justin N. Tawil, MD, Harvey J. Woehlck MD, Paul S. Pagel MD PhD

From the Departments of Anesthesiology (MTZ, BTB, JKF, MK, HYG, JNT, HJW), and
Pharmacy (JTF, JRGR), the Medical College of Wisconsin, 8701 Watertown Plank Road,
Milwaukee, Wisconsin 53226, and the Anesthesia Service (PSP), the Clement J. Zablocki
Veterans Affairs Medical Center, Milwaukee, Wisconsin. This work was supported entirely by
departmental funds. The authors have no conflicts of interest pursuant to this report.

Running Title: Hydroxocobalamin and fluid balance

Keywords: Hydroxocobalamin; methylene blue; systemic inflammatory response syndrome;
vasoplegic syndrome; norepinephrine; vasopressin; resuscitation; fluid balance; capillary
permeability
