This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Decision-Making Skills improve with Critical Care Training: Using Simulation to Measure Progress***

David J Murray MD<sup>1,4</sup>; Walter A Boyle MD<sup>1,2</sup>, FCCM; Mary Beth Beyatte DNP, RN, ACNP-BC<sup>1,2,3</sup>; Justin G Knittel MD<sup>1,2</sup>; Paul W Kerby MD<sup>1,2</sup>; Julie Woodhouse RN, MEd. and John R Boulet PhD<sup>4</sup>

Washington University School of Medicine, Department of Anesthesiology<sup>1</sup>, Anesthesiology Critical Care Medicine Division<sup>2</sup>, Goldfarb School of Nursing at Barnes-Jewish College<sup>3</sup> Washington University Clinical Simulation Center, St Louis, MO<sup>4</sup>; and Foundation for Advancement of International Medical Education and Research<sup>5</sup>, Philadelphia, PA

This study was conducted in the Washington University Wood Simulation Center, Washington University School of Medicine, 660 S. Euclid Avenue, St. Louis, MO, 63110

Support: This work was funded by the AHRQ Grant: R18 HS022265-01 Critical Care Management: A Simulation-Based Assessment of Decision-Making Skills.

Key words: Simulation; Critical Care; Intensive Care Units; Educational Measurement; Diagnostic Skills, Acute Care Nurse Practitioners

Author for Correspondence:
