Absolute lactate value versus relative reduction as a predictor of mortality in severe sepsis and septic shock

Sharukh Lokhandwala MD, Lars W. Andersen MD, MPH, Sunil Nair MD, Parth Patel BS, Michael N. Cocchi MD, Michael W. Donnino MD

PII: S0883-9441(16)30586-X
DOI: doi: [10.1016/j.jcrc.2016.09.023](https://doi.org/10.1016/j.jcrc.2016.09.023)
Reference: YJCRC 52293

To appear in: *Journal of Critical Care*

Please cite this article as: Lokhandwala Sharukh, Andersen Lars W., Nair Sunil, Patel Parth, Cocchi Michael N., Donnino Michael W., Absolute lactate value versus relative reduction as a predictor of mortality in severe sepsis and septic shock, *Journal of Critical Care* (2016), doi: [10.1016/j.jcrc.2016.09.023](https://doi.org/10.1016/j.jcrc.2016.09.023)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Absolute lactate value versus relative reduction as a predictor of mortality in severe sepsis and septic shock**Authors**
