26 **Abstract**

27 General, regional and local anaesthesia have all been employed for breast cancer surgery with  
28 good results. However, they differ in their side effect and complications profile. With the  
29 increase in the incidence and detection of breast cancer, evidence is accumulating towards the  
30 choice of anaesthetic technique affecting its recurrence and metastasis rate. This review aims  
31 to address the role of the anaesthesiologist in modern day breast cancer surgery, with focus  
32 on measures to reduce its recurrence and achieving peri-operative patient safety for primary,
