

## Author's Accepted Manuscript

Method validation studies and an inter-laboratory cross validation study of lenvatinib assay in human plasma using LC-MS/MS

Yuji Mano

PII: S2352-5517(18)30025-8  
DOI: <https://doi.org/10.1016/j.plabm.2018.e00103>  
Article Number: e00103  
Reference: PLABM103

To appear in: *Practical Laboratory Medicine*

Received date: 5 March 2018  
Revised date: 2 May 2018  
Accepted date: 23 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
