

Accepted Manuscript

Bone microarchitecture, biomechanical properties, and advanced glycation end-products in the proximal femur of adults with type 2 diabetes

Lamya Karim, Julia Moulton, Miranda Van Vliet, Kelsey Velie, Ann Robbins, Fatemeh Malekipour, Ayesha Abdeen, Douglas Ayres, Mary L. Bouxsein

PII: S8756-3282(18)30220-5
DOI: doi:[10.1016/j.bone.2018.05.030](https://doi.org/10.1016/j.bone.2018.05.030)
Reference: BON 11666
To appear in: *Bone*
Received date: 12 February 2018
Revised date: 3 May 2018
Accepted date: 29 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Bone Microarchitecture, Biomechanical Properties, and Advanced Glycation End-Products in the Proximal Femur of Adults with Type 2 Diabetes
