LARG GEF and ARHGAP18 orchestrate RhoA activity to control mesenchymal stem cell lineage

William R. Thompson, Sherwin S. Yen, Gunes Uzer, Zhihui Xie, Buer Sen, Maya Styner, Keith Burrridge, Janet Rubin

PII: S8756-3282(17)30441-6
DOI: doi:[10.1016/j.bone.2017.12.001](https://doi.org/10.1016/j.bone.2017.12.001)
Reference: BON 11490
To appear in: *Bone*
Received date: 9 August 2017
Revised date: 29 November 2017
Accepted date: 1 December 2017

Please cite this article as: William R. Thompson, Sherwin S. Yen, Gunes Uzer, Zhihui Xie, Buer Sen, Maya Styner, Keith Burrridge, Janet Rubin , LARG GEF and ARHGAP18 orchestrate RhoA activity to control mesenchymal stem cell lineage. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Bone*(2017), doi:[10.1016/j.bone.2017.12.001](https://doi.org/10.1016/j.bone.2017.12.001)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Funding support: This study was supported by AR056655, AR064133, AR069943, GM029860, P20GM109095, AR062097

Abstract words/characters: 248/1,835; Manuscript words/characters: 3,631/25,361; Figures (black and white): 5; Figures (color): 0; Tables: 0

Conflict of Interest: All authors have no conflicts of interest.

Running Title: LARG and ARHGAP18 control mesenchymal stem cell fate

Author Contributions:

William Thompson: concept/design, collection/assembly of data, data analysis/interpretation, manuscript writing, final approval of manuscript

Sherwin Yen: concept/design, collection/assembly of data, data analysis/interpretation, final approval of manuscript

Gunes Uzer: concept/design, collection/assembly of data, data analysis/interpretation, final approval of manuscript

Zhihui Xie: collection/assembly of data

Buer Sen: data analysis/interpretation, final approval of manuscript

Maya Styner: data analysis/interpretation, final approval of manuscript

Keith Burrridge: concept/design, data analysis/interpretation, final approval of manuscript

Janet Rubin: concept/design, financial support, data analysis/interpretation, manuscript writing, final approval of manuscript

Keywords: LARG, ARHGAP18, RhoA, Mesenchymal stem cells, Adipogenesis, Osteogenesis
