

## Accepted Manuscript

Title: Disruptions to the cerebellar GABAergic system in juvenile guinea pigs following preterm birth

Authors: Julia C. Shaw, Hannah K. Palliser, Rebecca M. Dyson, Mary J. Berry, Jonathan J. Hirst

PII: S0736-5748(17)30247-2  
DOI: <https://doi.org/10.1016/j.ijdevneu.2017.10.002>  
Reference: DN 2219

To appear in: *Int. J. Devl Neuroscience*

Received date: 23-8-2017  
Revised date: 5-10-2017  
Accepted date: 6-10-2017

Please cite this article as: Shaw, Julia C., Palliser, Hannah K., Dyson, Rebecca M., Berry, Mary J., Hirst, Jonathan J., Disruptions to the cerebellar GABAergic system in juvenile guinea pigs following preterm birth. *International Journal of Developmental Neuroscience* <https://doi.org/10.1016/j.ijdevneu.2017.10.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Disruptions to the cerebellar GABAergic system in juvenile guinea pigs following preterm birth

Highlights:

1. Children born preterm are at risk of cognitive problems and behavioural disorders
2. Myelination and GABAergic neurons are disrupted in juvenile preterm guinea pigs
3. Premature loss of neurosteroids post birth may be involved in these disruptions
