

## Accepted Manuscript

Distal radius microstructure and finite element bone strain are related to site-specific mechanical loading and areal bone mineral density in premenopausal women

Megan E. Mancuso, Joshua E. Johnson, Sabahat S. Ahmed, Tiffany A. Butler, Karen L. Troy

PII: S2352-1872(18)30019-6  
DOI: doi:[10.1016/j.bonr.2018.04.001](https://doi.org/10.1016/j.bonr.2018.04.001)  
Reference: BONR 149  
To appear in: *Bone Reports*  
Received date: 25 July 2017  
Revised date: 20 March 2018  
Accepted date: 5 April 2018

Please cite this article as: Megan E. Mancuso, Joshua E. Johnson, Sabahat S. Ahmed, Tiffany A. Butler, Karen L. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
