This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Difference between observed and predicted glycated hemoglobin at baseline and treatment response to vildagliptin-based dual oral therapy in patients with type 2 diabetes

Authors: Jun-Sing Wang^{a,h}, Yi-Jen Hung^b, Yung-Chuan Lu^{c,i}, Cheng-Lin Tsai^d, Wei-Shiung Yang^e, Ting-I Lee^{f,j}, Ya-Chun Hsiao^g, Wayne Huey-Herng Sheu^{a,h,k,l}
