Transposons, Stress and the Functions of the Deep Genome

Andrew A. Bartlett, Richard G. Hunter

PII: S0091-3022(18)30022-0

DOI: <https://doi.org/10.1016/j.yfrne.2018.03.002>

Reference: YFRNE 705

To appear in: *Frontiers in Neuroendocrinology*

Received Date: 30 November 2017

Revised Date: 5 March 2018

Accepted Date: 14 March 2018

Please cite this article as: A.A. Bartlett, R.G. Hunter, Transposons, Stress and the Functions of the Deep Genome, *Frontiers in Neuroendocrinology* (2018), doi: <https://doi.org/10.1016/j.yfrne.2018.03.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Transposons, Stress and the Functions of the Deep Genome

Andrew A. Bartlett¹ and Richard G. Hunter, Ph.D.^{1,2,*}

1-University of Massachusetts Boston Department of Psychology, University of
Massachusetts, Boston, MA, USA

2-Laboratory of Neuroendocrinology, The Rockefeller University, New York, NY,
