

Accepted Manuscript

Isolation of an insulin-like peptide from the Asian malaria mosquito, *Anopheles stephensi*, that acts as a steroidogenic gonadotropin across diverse mosquito taxa

Andrew B. Nuss, Mark R. Brown

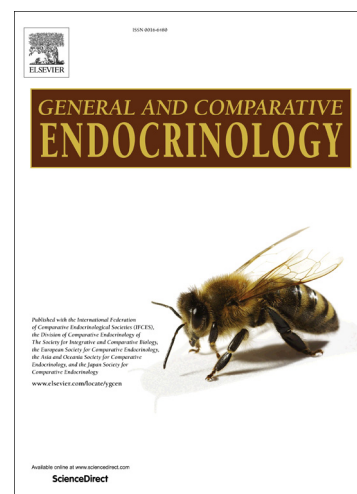

PII: S0016-6480(17)30162-4
DOI: <http://dx.doi.org/10.1016/j.ygcen.2017.05.007>
Reference: YGCEN 12637

To appear in: *General and Comparative Endocrinology*

Received Date: 1 March 2017
Revised Date: 2 May 2017
Accepted Date: 10 May 2017

Please cite this article as: Nuss, A.B., Brown, M.R., Isolation of an insulin-like peptide from the Asian malaria mosquito, *Anopheles stephensi*, that acts as a steroidogenic gonadotropin across diverse mosquito taxa, *General and Comparative Endocrinology* (2017), doi: <http://dx.doi.org/10.1016/j.ygcen.2017.05.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

General and Comparative Endocrinology 5/2/14

Isolation of an insulin-like peptide from the Asian malaria mosquito, *Anopheles stephensi*, that acts as a steroidogenic gonadotropin across diverse mosquito taxa

Andrew B. Nuss^{1,2} and Mark R. Brown¹
