

## Accepted Manuscript

The brain-gut axis of fish: Rainbow trout with low and high cortisol response show innate differences in intestinal integrity and brain gene expression

Malin Rosengren, Per-Ove Thörnqvist, Svante Winberg, Kristina Sundell

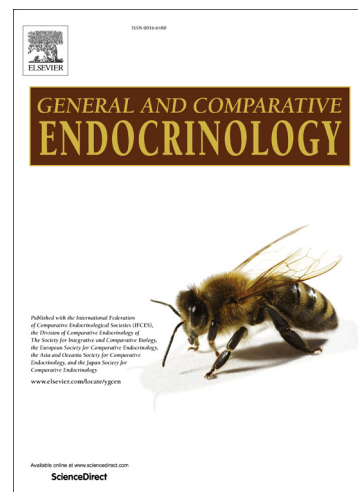

PII: S0016-6480(17)30658-5  
DOI: <https://doi.org/10.1016/j.ygcen.2017.09.020>  
Reference: YGCEN 12764

To appear in: *General and Comparative Endocrinology*

Received Date: 13 January 2017  
Revised Date: 23 May 2017  
Accepted Date: 21 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **The brain-gut axis of fish: Rainbow trout with low and high cortisol response show**  
2 **innate differences in intestinal integrity and brain gene expression**
