This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Rapid eGFR Change as a Determinant of Cardiovascular and Renal Disease Outcomes and of Mortality in Hypertensive Adults with and without Type 2 Diabetes

Joshua I. Barzilay, MD¹; Barry R. Davis, MD, PhD²; Alokanda Ghosh MD, PhD²; Sara L. Pressel, MS²; Mahboob Rahman, MD³; Paula T. Einhorn, MD, MS⁴; William C. Cushman, MD⁵; Paul K. Whelton, MB, MD, MSc⁶; Jackson T. Wright, Jr., MD, PhD⁷ for the ALLHAT Collaborative Research Group⁸

1. Division of Endocrinology, Kaiser Permanente of Georgia, and the Division of Endocrinology, Emory University School of Medicine, Atlanta, GA

2. Coordinating Center for Clinical Trials, the University of Texas School of Public Health, Houston, TX

3. Division of Nephrology, University Hospitals Case Western Reserve University, Cleveland, OH

4. Division of Cardiovascular Sciences, National Heart, Lung, and Blood Institute, Bethesda, MD

5. Preventive Medicine Section, Veterans Affairs Medical Center, Memphis, TN

6. Department of Epidemiology, School of Public Health and Tropical Medicine, Tulane University, New Orleans, LA

7. Division of Nephrology and Hypertension, Case Western Reserve University, University Hospitals Case Medical Center, Louis Stokes Cleveland Veterans Affairs Medical Center, Cleveland, OH.

8. Members of the ALLHAT Collaborative Research Group are published in JAMA 2000; 283: 1973-1975.

Words: Abstract: 49, Text: 976; **References:** 11, **Figure:** 1

Key words: eGFR change, CVD risk, Mortality risk, Type 2 diabetes

Trial Registration: NCT: 00000542
