The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Ymeta(2018), doi:[10.1016/j.metabol.2018.05.004](https://doi.org/10.1016/j.metabol.2018.05.004)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Skeletal muscle-specific Sidt2 knockout in mice induced muscular dystrophy-like phenotype

Huan Liu^{1#}, Wenjun Jiang^{1#}, Xueru Chen¹, Guoying Chang¹, Lei Zhao², Xihua Li^{2*},
Huiwen Zhang^{1*}

Running title: Sidt2 deficiency leads to mouse muscular dystrophy-like phenotype

¹Pediatric Endocrinology and Genetic Metabolism, Xinhua Hospital, Shanghai Institute for Pediatric Research, Shanghai Jiao Tong University School of Medicine, Shanghai, China

²Department of Neurology, Children's Hospital of Fudan University, Shanghai, China

[#]These authors contributed equally to the study

Declarations of interest: none
