Evidence for a novel, neurohumoral antinociceptive mechanism mediated by peripheral capsaicin-sensitive nociceptors in conscious rats

Gábor Pethő, Kata Bölcskei, Réka Füredi, Bálint Botz, Teréz Bagoly, Erika Pintér, János Szolcsányi

PII: S0143-4179(16)30046-4
DOI: doi: [10.1016/j.npep.2017.02.079](https://doi.org/10.1016/j.npep.2017.02.079)
Reference: YNPEP 1790

To appear in: *Neuropeptides*

Received date: 9 May 2016
Revised date: 16 December 2016
Accepted date: 7 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Evidence for a novel, neurohumoral antinociceptive mechanism mediated by peripheral
capsaicin-sensitive nociceptors in conscious rats**
