This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***PEMT* rs12325817 and *PCYT1A* rs7639752 polymorphisms are associated with betaine but not choline concentrations in pregnant women**

Running head: Choline and carnitine intake and metabolism in pregnant women
