

Accepted Manuscript

A novel high-resolution multilocus sequence typing of *Giardia intestinalis* Assemblage A isolates reveals zoonotic transmission, clonal outbreaks and recombination

Johan Ankarklev, Marianne Lebbad, Elin Einarsson, Oscar Franzén, Harri Ahola, Karin Troell, Staffan G. Svärd

PII: S1567-1348(18)30057-1
DOI: <https://doi.org/10.1016/j.meegid.2018.02.012>
Reference: MEEGID 3413
To appear in: *Infection, Genetics and Evolution*
Received date: 20 December 2017
Revised date: 30 January 2018
Accepted date: 9 February 2018

The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Meegid(2017), <https://doi.org/10.1016/j.meegid.2018.02.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A novel high-resolution multilocus sequence typing of *Giardia intestinalis* Assemblage A isolates reveals zoonotic transmission, clonal outbreaks and recombination
