Nationwide genetic surveillance of *Plasmodium vivax* in Papua New Guinea reveals heterogeneous transmission dynamics and routes of migration amongst subdivided populations

Abebe A. Fola, Elma Nate, G.L. Abby Harrison, Céline Barnadas, Manuel W. Hetzel, Jonah Iga, Peter Siba, Ivo Mueller, Alyssa E. Barry

PII: S1567-1348(17)30416-1
DOI: doi:[10.1016/j.meegid.2017.11.028](https://doi.org/10.1016/j.meegid.2017.11.028)
Reference: MEEGID 3343
To appear in: *Infection, Genetics and Evolution*
Received date: 4 August 2017
Revised date: 27 October 2017
Accepted date: 30 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Research Paper

Nationwide genetic surveillance of *Plasmodium vivax* in Papua New Guinea reveals heterogeneous transmission dynamics and routes of migration amongst subdivided populations
