

## Accepted Manuscript

Novel HBV recombinants between genotypes B and C in 3'-terminal reverse transcriptase (RT) sequences are associated with enhanced viral DNA load, higher RT point mutation rates and place of birth among Chinese patients

Baoming Liu, Jing-Xian Yang, Ling Yan, Hui Zhuang, Tong Li

PII: S1567-1348(17)30376-3  
DOI: doi:[10.1016/j.meegid.2017.10.023](https://doi.org/10.1016/j.meegid.2017.10.023)  
Reference: MEEGID 3311  
To appear in: *Infection, Genetics and Evolution*  
Received date: 30 March 2017  
Revised date: 25 October 2017  
Accepted date: 26 October 2017

Please cite this article as: Baoming Liu, Jing-Xian Yang, Ling Yan, Hui Zhuang, Tong Li , Novel HBV recombinants between genotypes B and C in 3'-terminal reverse transcriptase (RT) sequences are associated with enhanced viral DNA load, higher RT point mutation rates and place of birth among Chinese patients. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate.
