Graphical abstract. Main findings concerning relative risks of comorbidities among MS cases compared to age- and gender matched population. Overall survival disadvantage was associated with comorbidity for diseases of circulatory system.

	194	172	120	61	17	0
Circulatory disease	194	172	120	61	17	0
No circulatory disease	680	448	230	69	13	1
Control	8752	6198	3543	1328	343	17
