

## Accepted Manuscript

Title: Expression of full-length *Plasmodium falciparum* P48/45 in *P. berghei* blood stages: a method to express and evaluate vaccine antigens

Authors: Ahmad Syibli Othman, Jing-wen Lin, Blandine M Franke-Fayard, Hans Kroeze, Fiona J.A. van Pul, Séverine Chevalley-Maurel, Jai Ramesar, Catherin Marin-Mogollon, Matthijs M. Jore, Merribeth J. Morin, Carole A. Long, Robert Sauerwein, Ashley Birkett, Kazutoyo Miura, Chris J. Janse, Shahid M. Khan

PII: S0166-6851(18)30104-X  
DOI: <https://doi.org/10.1016/j.molbiopara.2018.07.009>  
Reference: MOLBIO 11142

To appear in: *Molecular & Biochemical Parasitology*

Received date: 29-5-2018  
Revised date: 10-7-2018  
Accepted date: 19-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Full-length Pfs48/45 protein is efficiently expressed in blood stages of *P. berghei*
- *P. berghei* blood-stage expressed Pfs48/45 retain conformational epitopes
- Strong transmission blocking immunity is induced by *P. berghei* expressed Pfs48/45
