This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Intravascular Ultrasound Enhances the Safety of Rotational Atherectomy

Kenichi Sakakura, MD; Kei Yamamoto, MD; Yousuke Taniguchi, MD; Yoshimasa Tsurumaki, MD; Shin-ichi Momomura, MD; Hideo Fujita, MD

Division of Cardiovascular Medicine, Saitama Medical Center, Jichi Medical University, Saitama, Japan

Running Head: IVUS enhances the safety of RA

Corresponding author: Kenichi Sakakura, MD

Division of Cardiology, Department of Cardiovascular, Saitama Medical Center, Jichi Medical University, 1-847 Amanuma-cho, Omiya-ku, Saitama-city, Saitama, Japan 330-8503, Phone: +81-48-647-2111, Fax: +81-48-648-5188 252-0375, E-mail: ksakakura@jichi.ac.jp

Key words: Rotational atherectomy; Intravascular Ultrasound; Percutaneous Coronary Intervention.

Disclosures: Dr. Sakakura has received speaking honoraria from Abbott Vascular, Boston Scientific, Medtronic Cardiovascular, Terumo, OrbusNeich, and NIPRO; has served as a proctor for Rotablator for Boston Scientific; and has served as a consultant for Abbott Vascular and Boston Scientific. **Acknowledgements:** The authors acknowledge all staff in the catheter laboratory in Saitama Medical Center, Jichi Medical University for their technical support in this study. **Funding:** This work was supported by Grants-in-Aid for Scientific Research (C) (Kenichi Sakakura, JSPS KAKENHI Grant Number 17K09521).
