EPG waveform library for *Graphocephala atropunctata* (Hemiptera: Cicadellidae): Effect of adhesive, input resistor, and voltage levels on waveform appearance and probing behaviors

Felix A. Cervantes, Elaine A. Backus

PII: S0022-1910(18)30020-9

DOI: <https://doi.org/10.1016/j.jinsphys.2018.05.008>

Reference: IP 3792

To appear in: *Journal of Insect Physiology*

Received Date: 19 January 2018

Revised Date: 23 May 2018

Accepted Date: 23 May 2018

Please cite this article as: Cervantes, F.A., Backus, E.A., EPG waveform library for *Graphocephala atropunctata* (Hemiptera: Cicadellidae): Effect of adhesive, input resistor, and voltage levels on waveform appearance and probing behaviors, *Journal of Insect Physiology* (2018), doi: <https://doi.org/10.1016/j.jinsphys.2018.05.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

For submission to:

Journal of Insect Physiology
