A single exercise bout augments adenovirus-specific T-cell mobilization and function

Hawley E. Kunz, Guillaume Spielmann, Nadia H. Agha, Daniel P. O'Connor, Catherine M. Bollard, Richard J. Simpson

PII: S0031-9384(18)30216-6
DOI: doi:[10.1016/j.physbeh.2018.04.035](https://doi.org/10.1016/j.physbeh.2018.04.035)
Reference: PHB 12186

To appear in: *Physiology & Behavior*

Received date: 23 March 2018
Revised date: 25 April 2018
Accepted date: 28 April 2018

Please cite this article as: Hawley E. Kunz, Guillaume Spielmann, Nadia H. Agha, Daniel P. O'Connor, Catherine M. Bollard, Richard J. Simpson , A single exercise bout augments adenovirus-specific T-cell mobilization and function. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Phb(2017), doi:[10.1016/j.physbeh.2018.04.035](https://doi.org/10.1016/j.physbeh.2018.04.035)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A Single Exercise Bout Augments Adenovirus-Specific T-Cell Mobilization
and Function**
