## Accepted Manuscript

Homeostatic and non-homeostatic controls of feeding behavior: Distinct vs. common neural systems

Clarissa M. Liu, Scott E. Kanoski

PII: S0031-9384(18)30055-6

DOI: doi:10.1016/j.physbeh.2018.02.011

Reference: PHB 12071

To appear in: Physiology & Behavior

Received date: 24 November 2017 Revised date: 2 February 2018 Accepted date: 3 February 2018

Please cite this article as: Clarissa M. Liu, Scott E. Kanoski, Homeostatic and non-homeostatic controls of feeding behavior: Distinct vs. common neural systems. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Phb(2018), doi:10.1016/j.physbeh.2018.02.011

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **ACCEPTED MANUSCRIPT**

Homeostatic and non-homeostatic controls of feeding behavior: distinct vs. common neural systems

Clarissa M. Liu<sup>a,b</sup> and Scott E. Kanoski<sup>a,b,\*</sup>

<sup>a</sup>University of Southern California, Neuroscience Graduate Program, Los Angeles, CA, United States <sup>b</sup>University of Southern California, Department of Biological Sciences, Human and Evolutionary Biology Section, Los Angeles, CA, United States

Keywords: Food intake, hypothalamus, energy balance, obesity, hippocampus, food reward, dopamine

\* Corresponding author.
