

## Accepted Manuscript

Title: Exercise testing in patients with diaphragm paresis

Authors: Tristan Bonnevie, Francis-Edouard Gravier, Agathe Ducrocq, David Debeaumont, Catherine Viacroze, Antoine Cuvelier, Jean-François Muir, Catherine Tardif

PII: S1569-9048(17)30348-8  
DOI: <https://doi.org/10.1016/j.resp.2017.11.006>  
Reference: RESPNB 2891

To appear in: *Respiratory Physiology & Neurobiology*

Received date: 4-10-2017  
Revised date: 13-11-2017  
Accepted date: 14-11-2017

Please cite this article as: Bonnevie, Tristan, Gravier, Francis-Edouard, Ducrocq, Agathe, Debeaumont, David, Viacroze, Catherine, Cuvelier, Antoine, Muir, Jean-François, Tardif, Catherine, Exercise testing in patients with diaphragm paresis. *Respiratory Physiology and Neurobiology* <https://doi.org/10.1016/j.resp.2017.11.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Type:** Original research

**Exercise testing in patients with diaphragm paresis.**

**Short title:** Diaphragm paresis and exercise capacity

Tristan Bonnevie, PT, Msc (1, 2); Francis-Edouard Gravier, PT (1); Agathe Ducrocq, MD (3,4); David Debeaumont, MD (1,3); Catherine Viacroze, MD (4); Antoine Cuvelier, MD, PhD (2,4); Jean-François Muir, MD (1,2); Catherine Tardif, MD (1,2,3).

**Word Count (text only):** 2531.

**Highlight**

- Exercise capacity is slightly reduced in patients with DP ;
- Dyspnea is the main factor limiting exertion ;
- Diaphragm function is correlated with exercise ventilation ;
- Overall inspiratory muscle function is correlated with both exercise capacity and ventilation suggesting the importance of the accessory inspiratory muscles during exercise in patients with DP.

Word Count for the

**abstract:** 180.

**Number of figure:** 0

**Number of table:** 3
