This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Comparisons of the Framingham and Pooled Cohort Equation Risk Scores for Detecting Subclinical Vascular Disease in Blacks Versus Whites

Running title: Subclinical vascular disease and race

Matthew L Topel MD MSc^a, Jia Shen MD MPH^a, Alanna A. Morris MD MSc^a, Ibhar Al Mheid MD^a, Salman Sher MD^a, Sandra B. Dunbar PhD^b, Viola Vaccarino MD PhD^c, Laurence S. Sperling MD^a, Gary H. Gibbons MD^d, Greg S. Martin MD MSc^e, Arshed A. Quyyumi MD^a

a. Department of Cardiology, Emory University School of Medicine, Atlanta, GA

b. Nell Hodgson Woodruff School of Nursing, Emory University School of Medicine, Atlanta, GA

c. Department of Epidemiology, Emory Rollins School of Public Health, Atlanta, GA

d. National Institutes of Health/National Heart, Lung, and Blood Institute, Bethesda, MD

e. Department of Pulmonary, Allergy, Critical Care and Sleep Medicine, Emory University School of Medicine, Atlanta, GA

Grant Support:

NIH/NHLBI 1 U01 HL079156-01 (Quyyumi) and 1 U01 HL79214-01 (Gibbons). Further support was provided by the Emory Heart and Vascular Center and grants from the National Institutes of Health (UL1 RR025008 from the Clinical and Translational Science Award program, R01 HL089650 and R01 HL113451) as well as the American Heart Association (AHA) Strategically Focused Research Network on Disparities (Grant 0000031288).
