This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Patterns of Practice in Mediastinal Lymph Node Staging for Non-Small Cell Lung Cancer in CanadaSimon R Turner, Nazgol Seyednejad, Basil S Nasir
The Annals of Thoracic Surgery

Various thresholds used by Canadian thoracic surgeons as indications to perform invasive mediastinal staging for potentially resectable non-small cell lung cancer.
