Effects of high-intensity interval training on optic nerve head and macular perfusion using optical coherence tomography angiography in healthy adults

Boris Schmitz, Pieter Nelis, Florian Rolfes, Maged Alnawaiseh, Andreas Klose, Michael Krüger, Nicole Eter, Stefan-Martin Brand, Florian Alten

PII: S0021-9150(18)30213-2

DOI: [10.1016/j.atherosclerosis.2018.04.028](https://doi.org/10.1016/j.atherosclerosis.2018.04.028)

Reference: ATH 15481

To appear in: *Atherosclerosis*

Received Date: 24 October 2017

Revised Date: 11 April 2018

Accepted Date: 24 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effects of high-intensity interval training on optic nerve head and macular perfusion using optical coherence tomography angiography in healthy adults
