

Accepted Manuscript

Cough Frequency During Treatment Associated with Baseline Cavitory Volume and Proximity to the Airway in Pulmonary Tuberculosis

Alvaro Proaño, MD, David Bui, MPH, José W. López, MD, Nancy M. Vu, MD, Marjory A. Bravard, MD, Gwennyth O. Lee, PhD, Brian H. Tracey, PhD, Ziyue Xu, PhD, Germán Comina, PhD, Eduardo Ticona, MD, Daniel J. Mollura, MD, Jon S. Friedland, FRCP, David A.J. Moore, FRCP, Carlton A. Evans, FRCP, Philip Caligiuri, MD, Robert H. Gilman, MD, for the Tuberculosis Working Group in Peru

PII: S0012-3692(18)30413-6

DOI: [10.1016/j.chest.2018.03.006](https://doi.org/10.1016/j.chest.2018.03.006)

Reference: CHEST 1618

To appear in: *CHEST*

Received Date: 16 December 2017

Revised Date: 14 February 2018

Accepted Date: 1 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Word Counts:** Abstract (249); Text Body (2500)

2 **Cough Frequency During Treatment Associated with Baseline Cavitory Volume and**
3 **Proximity to the Airway in Pulmonary Tuberculosis**

4 **Short Title:** *Cough Frequency and Cavitation in Pulmonary TB*
