

Vascular Access: 2018 Clinical Practice Guidelines of the European Society for Vascular Surgery (ESVS)[☆]

Jürg Schmidli^{a,*}, Matthias K. Widmer^a, Carlo Basile^a, Gianmarco de Donato^a, Maurizio Gallieni^a, Christopher P. Gibbons^a, Patrick Haage^a, George Hamilton^a, Ulf Hedin^a, Lars Kamper^a, Miltos K. Lazarides^a, Ben Lindsey^a, Gaspar Mestres^a, Marisa Pegoraro^a, Joy Roy^a, Carlo Setacci^a, David Shemesh^a, Jan H.M. Tordoir^a, Magda van Loon^a,

ESVS Guidelines Committee^b, Philippe Kolh, Gert J. de Borst, Nabil Chakfe, Sebastian Debus, Rob Hinchliffe, Stavros Kakkos, Igor Koncar, Jes Lindholt, Ross Naylor, Melina Vega de Ceniga, Frank Vermassen, Fabio Verzini,

ESVS Guidelines Reviewers^c, Markus Mohaupt, Jean-Baptiste Ricco, Ramon Roca-Tey

Keywords: Guideline, Arteriovenous access, Vascular access, Arteriovenous fistula, Arteriovenous graft, Renal insufficiency, Haemodialysis, Surveillance, Complications, ESRD

TABLE OF CONTENTS

1. Methodology and Grading of Recommendations	3
1.1. Purpose	3
1.2. Methodology	4
1.3. Definitions	5
1.3.1. Definition of vascular access	5
1.3.2. Other definitions	5
2. Epidemiology of chronic kidney disease (CKD) stage 5	7
2.1. Epidemiology of chronic kidney disease	7
2.1.1. Epidemiology of end stage renal disease	8
2.1.1.1. Incidence	8
2.1.1.2. Prevalence	8
2.2. Demographics of end stage renal disease	8
2.3. Epidemiology of vascular access for dialysis	9
3. Clinical decision making	9
3.1. Choice of type of vascular access	9
3.2. Timing of referral for vascular access surgery	9
3.3. Selection of vascular access modality	10
3.3.1. Primary option for vascular access — autogenous arteriovenous fistula	10
3.3.1.1. Patient variables and outcome of vascular access	10
3.3.2. Secondary options for vascular access	11
3.3.3. Lower extremity vascular access	12
3.3.4. Indications for a permanent catheter for vascular access	12
4. Pre-operative imaging	13
4.1. Pre-operative assessment	13
4.2. Imaging methods for vascular access surveillance	14
4.2.1. Duplex ultrasound	14
4.2.2. Computed tomography angiography	14
4.2.3. Magnetic resonance angiography (MRA)	14
4.2.4. Digital subtraction angiography	15
5. Creation of vascular access	15
5.1. Technical aspects	15
5.1.1. Venous preservation	15
5.1.2. Arm exercises	16

[☆] The ESVS guidelines for Vascular Access are endorsed by the Vascular Access Society (VAS).

^a Writing Group: Jürg Schmidli* (Bern, Switzerland), Matthias K. Widmer (Bern, Switzerland), Carlo Basile (Bari, Italy), Gianmarco de Donato (Siena, Italy), Maurizio Gallieni (Milan, Italy), Christopher P. Gibbons (Banbury, UK), Patrick Haage (Witten, Germany), George Hamilton (London, UK), Ulf Hedin (Stockholm, Sweden), Lars Kamper (Witten, Germany), Miltos K. Lazarides (Alexandroupoli, Greece), Ben Lindsey (London, UK), Gaspar Mestres (Barcelona, Spain), Marisa Pegoraro (Milan, Italy), Joy Roy (Stockholm, Sweden), Carlo Setacci (Siena, Italy), David Shemesh (Jerusalem, Israel), Jan H.M. Tordoir (Maastricht, The Netherlands), Magda van Loon (Maastricht, The Netherlands).

^b ESVS Guidelines Committee: Philippe Kolh (Liege, Belgium), chair, Gert J. de Borst (Utrecht, Netherlands, co-chair and guideline coordinator), Nabil Chakfe (Strasbourg, France), Sebastian Debus (Hamburg, Germany), Rob Hinchliffe (Bristol, UK), Stavros Kakkos (Patras, Greece), Igor Koncar (Belgrade, Serbia), Jes Lindholt (Odense, Denmark), Ross Naylor (Leicester, UK), Melina Vega de Ceniga (Galdakao, Spain), Frank Vermassen (Ghent, Belgium), Fabio Verzini (Perugia, Italy).

^c ESVS Guidelines Reviewers: Markus Mohaupt (Bern, Switzerland), Jean-Baptiste Ricco (Strasbourg, France), Ramon Roca-Tey (Barcelona, Spain).

5.1.3.	Pre-operative or peri-operative hydration	16
5.1.4.	Prophylactic antibiotics	16
5.1.5.	Pre-operative antiplatelet agents	16
5.1.6.	Pre-operative physical examination	16
5.1.7.	Anaesthesia	17
5.1.8.	Peri-operative anticoagulation	17
5.1.9.	Arteriovenous fistula configuration	17
5.1.10.	Surgical techniques	17
5.1.11.	Choice of graft	19
5.1.12.	Sutures or nitinol anastomotic clips	19
5.1.13.	Other challenges: Patient and vessel characteristics	20
5.2.	Peri-operative assessment	20
5.3.	Peri-operative complications	20
5.3.1.	Haemorrhage	20
5.3.2.	Post-operative infection	20
5.3.3.	Non-infected fluid collections	21
5.3.4.	Early onset of vascular access induced limb ischaemia (See Chapter 7)	21
5.3.5.	Early thrombosis	22
5.4.	Post-operative care	22
5.5.	Training of surgeons to perform vascular access	22
6.	Surveillance of vascular access	23
6.1.	Access maturation and care	23
6.1.1.	Concept	23
6.1.2.	Maturation of arteriovenous fistula	23
6.1.2.1.	Physical examination and other diagnostic methods	23
6.1.2.2.	Time to maturation	23
6.1.3.	Time to cannulation of the arteriovenous graft	24
6.1.4.	Access care	24
6.1.5.	Assessment and treatment of maturation failure	24
6.2.	Measures to improve maturation	24
6.2.1.	Exercise	25
6.2.2.	Antiplatelets and anticoagulation	25
6.2.3.	Other treatment options	25
6.3.	Cannulation	25
6.3.1.	Access care before cannulation	26
6.3.1.1.	Skin preparation	26
6.3.1.2.	Anaesthesia	26
6.3.1.3.	Pre-cannulation examination	26
6.3.2.	Cannulation techniques	26
6.3.2.1.	Needle selection	26
6.3.2.2.	Ultrasound assisted cannulation	26
6.3.2.3.	Rope ladder technique	27
6.3.2.4.	Area technique	27
6.3.2.5.	Buttonhole technique	27
6.3.3.	Access care after needle withdrawal	28
6.4.	Access monitoring and surveillance	28
6.4.1.	Concept	28
6.4.2.	Monitoring	29
6.4.2.1.	Physical examination	29
6.4.3.	Surveillance	29
6.4.3.1.	Surveillance during haemodialysis	29
6.4.3.1.1.	Flow measurement methods	29
6.4.3.1.1.1.	Indirect flow measurement	29
6.4.3.1.1.2.	Direct flow measurement	29
6.4.3.1.2.	Access flow and pressure surveillance	30
6.4.3.1.3.	Dialysis efficiency measurements	30
6.4.3.1.3.1.	Recirculation	30
6.4.3.1.3.2.	Urea reduction ratio and dialysis rate	30
6.4.3.2.	Surveillance outside dialysis sessions	31
6.4.3.2.1.	Ultrasound	31
6.4.3.2.2.	Angiography	31
6.4.3.2.3.	Magnetic resonance angiography	31
6.5.	Nursing organisation	31
6.5.1.	Introduction	31
6.5.2.	Nursing organisation	32
6.5.2.1.	Nursing models	32
6.5.2.2.	Clinical governance	32
6.5.2.3.	Vascular access nurse	32
6.5.2.3.1.	Basic role of vascular access nurse	32
6.5.2.3.2.	Vascular access nurse coordinator and manager	32
6.5.2.4.	Future developments	32
