

## Accepted Manuscript

Title: Mechanisms of the Improvement in Peak VO<sub>2</sub> with Exercise Training in Heart Failure with Reduced or Preserved Ejection Fraction  
Mechanisms of the Improvement in Peak VO<sub>2</sub> with Exercise Training

Authors: Wesley J. Tucker PhD, Cecilia C. Lijauco MSN, RN, Christopher M. Hearon Jr. PhD, Siddhartha S. Angadi PhD, Michael D. Nelson PhD, Satyam Sarma MD, Shane Nanayakkara MBBS, André La Gerche MBBS, PhD, Mark J. Haykowsky PhD

PII: S1443-9506(17)31314-8  
DOI: <http://dx.doi.org/doi:10.1016/j.hlc.2017.07.002>  
Reference: HLC 2448

To appear in:

Received date: 8-5-2017  
Revised date: 22-6-2017  
Accepted date: 16-7-2017

Mechanisms of the Improvement in Peak VO<sub>2</sub> with Exercise Training in Heart Failure with Reduced or Preserved Ejection Fraction. *Heart, Lung and Circulation* <http://dx.doi.org/10.1016/j.hlc.2017.07.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **Mechanisms of the Improvement in Peak VO<sub>2</sub> with Exercise Training in Heart Failure with Reduced or Preserved Ejection Fraction**
