This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The effect of dual chamber minimal ventricular pacing on paroxysmal atrial fibrillation incidence in Myotonic Dystrophy type 1 patients: a prospective, randomized, single-blind, crossover study.

The minimal ventricular pacing to prevent AF in DMI patients.
